RECYCLABLE STRUCTURAL COMPOSITES FOR MARINE RENEWABLE ENERGY

Research question?

In the marine environment:

- metals corrode
- wood rots
- composites survive

Can we make a **sustainable composite structure** that is not a problem at end-of-life?

University of Plymouth research activities

Manufacture by monomer infusion under flexible tooling (MIFT)
natural fibre reinforcement
acrylic (PMMA) or polylactic acid (PLA) matrix
Demonstrator component ... to be decided/informed by you?
Life Cycle Assessment (LCA) using SimPro software
